The Ford Mansion was George Washington's military headquarters during the winter encampment of 1779-80. He spent several months there, joined by his wife Martha, in a home filled with his generals and support staff during that terrible winter.

The photographs on exhibit were commissioned by the National Park Service and will be published in an accessibility book. The book will enable physically challenged visitors to experience the house until such time that ramps and other accommodations are installed.

### Location:

Morristown National Historical Park 30 Washington Place, Morristown, New Jersey
